Film on Video: A Practical Guide to Making Video Look like Film is an accessible guide to making video captured on a camcorder, DSLR camera, smartphone, action camera or cinema camera look like it was shot on motion-picture celluloid film. Chapter by chapter, Jonathan Kemp introduces the reader to a key characteristic of celluloid film, explains the historical and practical reasons why it exists, before providing a simplified method for best replicating that characteristic on a digital camera. The book includes various practical exercises throughout that are designed to underline the takeaway principles of each chapter and features case studies on specific cameras including the Sony NX5 Camcorder, Canon 5D Mk IV, Canon 4000D, iPhone X, GoPro Hero 6, Blackmagic URSA Mini Pro 4.6K and Canon C200. Ideal for students studying film and media production and filmmaking newcomers who want to get up to speed quickly, this is an indispensable guide to how the numerous settings on a digital camera can be used to create footage that more closely resembles the film 'look'.

Whether you are a beginner, expert, or anywhere in between, The Crossley ID Guide will vastly improve your ability to identify birds. Unlike other guides, which provide isolated individual photographs or illustrations, this is the first book to feature large, lifelike scenes for each species. These scenes—640 in all—are composed from more than 10,000 of the author's images showing birds in a wide range of views--near and far, from

different angles, in various plumages and behaviors, including flight, and in the habitat in which they live. These beautiful compositions show how a bird's appearance changes with distance, and give equal emphasis to characteristics experts use to identify birds: size, structure and shape, behavior, probability, and color. This is the first book to convey all of these features visually--in a single image--and to reinforce them with accurate, concise text. Each scene provides a wealth of detailed visual information that invites and rewards careful study, but the most important identification features can be grasped instantly by anyone. By making identification easier, more accurate, and more fun than ever before, The Crossley ID Guide will completely redefine how its users look at birds. Essential for all birders, it also promises to make new birders of many people who have despaired of using traditional guides.

Presents an introduction to the features of the Canon EOS 5D Mark III, covering such topics as exposure, autofocus, Live View, menu operations, lenses, lighting, flash photography, and editing images

The Canon EOS 7D Mark II is an update to the classic 7D model, widely regarded as an excellent APS-C sensor DSLR, aimed at the serious enthusiast.

The new model boasts faster burst shooting, improved autofocus and a much broader ISO range, contained in one of its best-built camera bodies. For stills photographers, the Mark II offers an all cross-type, 65-point AF module that works in conjunction with a 150,000-pixel RGB + IR metering sensor, offering the latest version of the 'Intelligent Tracking and Recognition' (iTR) focus system featured in the EOS-1D X. With iTR engaged and an initial focus point selected, focus can be initiated with a half-depress of the shutter-release button, leaving the camera to track the subject as it moves across the frame. The camera's continuous shooting rate is 10 frames per second, previously limited to pro-grade sports cameras. The shutter is rated to more than 200,000 cycles. The main image sensor is a variant of the Dual Pixel AF design first seen in the Canon EOS 70D, offering 20MP output. Using its image sensor, the camera can capture information about subject position and depth whenever its mirror is raised. This potentially gives more decisive autofocus and subject tracking in 'Live View' and while shooting video. The Mark II's movie capabilities have been improved, offering 1080p/60 shooting capability and a choice of MOV or MP4 format, plus three compression options (IPB-Lite, IPB and All-I). AUTHOR: David Taylor is an award-winning landscape and travel photographer, born and raised in Newcastle upon Tyne, Tyne and Wear. His work has taken him all over the world, but away

from his photographic career David lives on an exposed hill, overlooking the market town of Hexham in Northumberland.
