This book is strictly designed for undergraduates who have followed a course of lectures based on standard works on contract law. It is intended to supplement your course materials, lectures and textbooks; it is a guide to revision rather than a substitute for the amount of reading that you need to do in order to succeed. Contract law is a vast subject as evidenced by the volume of material contained in standard works on the subject. It follows that a revision work cannot cover all the depth and detail that the student needs to know, and it does not set out to do so. The aim is to provide a concise overall picture of the key areas for revision.

Contract Law: A Case & Problem-Based Approach provides an organizational structure that introduces students to each major area of contract law before exploring these areas in greater depth later in the casebook. Specifically, the casebook is broken into three major parts, each of which is designed not only to orient the students to the major subject areas of contract law, but is also meant to help them appreciate the connections and relationships between and among these subject various areas. Short problems and drafting exercises are included throughout the book to test the students' understanding of material presented in the casebook and during classroom discussion. Additionally, included in the text are "thinking tools," which are designed to help the student think critically about the law, along with theoretical, historical, doctrinal, contextual, and practice-oriented notes to enrich the students' black-letter experience. Key Features: Three-part design allows students to gain an appreciation of all parts of contract law and • Brief introductions before each major section, along with thought questions designed to guide the students' reading. Short problems and drafting exercises throughout the book to test the students' understanding of material presented in the casebook and during classroom discussion. "Thinking tools," designed to help the student think critically about the law, along with theoretical, historical, doctrinal, contextual, and practice-oriented notes to enrich the students' black-letter experience. This compact casebook is designed for one-semester contracts classes. It helps students synthesize groups of related cases by focusing attention on the principles, policies, and rules of contract law. It employs many transitions and notes written for the students, rather than excerpting works written for professors or practitioners. Questions are limited to central issues to avoid overwhelming and losing the students. This revision is a thorough makeover that brings everything up to date, and includes a variety of recent cases, dealing with issues such as electronic communications and Internet contracting, while retaining the brevity and "principles approach" of earlier editions.

Covering the essentials of construction contracts, including how the law has developed, the reasoning behind key clauses and how contract law is applied in practice, this is an invaluable guide for students at undergraduate and postgraduate level, as well as for professionals working in the field.

In *Problems in Contract Law: Cases and Materials*, Ninth Edition, by Charles L. Knapp, Nathan M. Crystal, and Harry G. Prince, a balance of traditional and contemporary cases reflect the development and complexity of contract law. Explanatory notes and text place classic and contemporary cases in their larger legal context, while questions and problem exercises bridge theory and practice. Adaptable for instructors with different teaching techniques, this successful book includes various perspectives and contractual settings, and offers a highly intelligent, contemporary treatment of contract law. It can easily be used in teaching by traditional case analysis, through problem-based instruction, or using theoretical inquiry. New to the Ninth Edition: Seven new cases that reflect advances in or improved statements of contract law Two restored cases (*Kirksey v. Kirksey* and *Hill v. Jones*) that provide valuable perspectives on fundamental areas of contract law Eight new problems (including seven net additions and one replacement) to provide more review options for teachers and students and to add contemporary fact patterns A new, two-color design featuring interesting photographs illustrating people and places discussed in some of the cases Editing of note and text material to reduce length without affecting coverage Reorganization of text and comment material to focus comments primarily on historical developments, allowing professors flexibility in assigning or deleting comments Student accessibility to deleted cases from prior editions through *Connected Casebook*, allowing professors the further flexibility of continuing to easily assign cases for which they have a particular preference Professors and students will benefit from: Flexible application for professors with various teaching methodologies: traditional, problem, theoretical, and practical A mixture of classic and contemporary cases The authors' emphasis on accessibility of the material—rejecting a hide-the-ball approach Review questions at the end of each chapter that are primarily designed for students to perform self-assessments of their grasp of the material. Answers with explanations are included in an appendix within the book.

Contract Law: A Case & Problem-Based Approach is a unique casebook that provides an organizational structure introducing students to each major area of contract law before exploring these areas in greater depth later in the casebook. Specifically, the casebook is broken into three major parts, each of which is designed not only to orient the students to the major subject areas of contract law but also meant to help them appreciate the connections and relationships between and among these various subject areas. Part I, the "30,000-foot view," familiarizes students with contract law, discusses the sorts of problems with which contract law is concerned, and introduces them to some of the basic rules and theories governing contract law. Part II, the "10,000-foot view," exposes students to each major substantive area of contract law in more depth by discussing one classic case in each area, along with additional historical, theoretical, and contextual materials to supplement the black-letter doctrine. After finishing Parts I and II, the student will have a basic understanding of each major area of contract law, along with a good understanding of how these parts fit together. Part III is therefore designed to explore each of the major subject areas in greater depth, and is organized along the lines of a traditional contracts casebook, including a healthy mix of classic and modern cases, short problems, and exercises. New to the Second Edition: Additional materials and cases added to explore the contract doctrines of impossibility and impracticability in light of past and current epidemics (in the case of polio) and pandemics (in the case of COVID-19). Additional case added to explore the relationship between Contract Law, Civil Rights, and Constitutional Law. Reorganization of some materials in Chapter 8 (defenses). More focused notes and appendices Professors and student will benefit from: Organization exposes students to main concepts, and gives professors a number of choices about how to teach their course. Helpful doctrinal introductions to each new major substantive section. Historical, theoretical, and comparative materials are presented to help students understand and think critically about the black-letter rules. "Thinking tools" feature that helps the student think critically about the law, along with theoretical, historical, doctrinal, contextual, and practice-oriented notes enrich the students' black-letter experience. Enjoyable, contextual materials that are included after a number of classic cases help to bring to light fascinating background information.
