American manufacturing has been on the decline for at least two generations. That fact is plain to any observer who travels through the Rust Belt of the Midwest, where the closing of steel plants and automobile factories has created ghost towns that dot the landscape. It is also clear from the dormant New England textile mills, whose owners surrendered their production first to cheaper mills in the Southeast before they, in turn, lost out to Asian labor. What caused this calamity, and what can be done about it? Andrew O. Smith argues that we lost our manufacturing not simply to forces beyond our control, such as globalization and cheaper labor overseas, but as the result of misguided policies that are well within our abilities to reform for the benefit of manufacturing. Examining six areas of public policy—the tax system, health care, the legal system, workers' compensation, government regulations, and labor policy—Smith demonstrates that in each of these areas, current policy choices have created a hostile environment for manufacturing. Grounding his arguments not in polemic or ideology but in historical analysis and current research, Smith illustrates his points with real-world examples to show how a New Social Compact can fix the problems that manufacturers face, without sacrificing public policy goals.

Look at the state of the world right now. It's a terrible mess, and that's putting it mildly. There has never been a more dangerous time. The politicians and special interests in Washington, DC, are directly responsible for the mess we are in. So why should we continue listening to them? It's time to bring America back to its rightful owners-the American people. I'm not going to play the same game politicians have been playing for decades-all talk, no action, while special interests and lobbyists dictate our laws. I am shaking up the establishment on both sides of the political aisle because I can't be bought. I want to bring America back, to make it great and prosperous again, and to be sure we are respected by our allies and feared by our adversaries. It's time for action. Americans are fed up with politics as usual. And they should be! In this book, I outline my vision to make America great again, including: how to fix our failing economy; how to reform health care so it is more efficient, cost-effective, and doesn't alienate both doctors and patients; how to rebuild our military and start winning wars-instead of watching our enemies take over-while keeping our promises to our great veterans; how to ensure that our education system offers the resources that allow our students to compete internationally, so tomorrow's jobseekers have the tools they need to succeed; and how to immediately bring jobs back to America by closing our doors to illegal immigrants, and pressuring businesses to produce their goods at home. This book is my blueprint for how to Make America Great Again. It's not hard. We just need someone with the courage to say what needs to be said. We won't find that in Washington, DC. Human rights activist and historian Roxanne Dunbar-Ortiz has been described as “a force of nature on the page and off.” That force is fully present in *Blood on the Border*, the third in her acclaimed series of memoirs. Seamlessly blending the personal and the political, *Blood on the Border* is Dunbar-Ortiz’s firsthand account of the decade-long dirty war pursued by the Contras and the United States against the people of Nicaragua. With the 1981 bombing of a Nicaraguan plane in Mexico City—a plane Dunbar-Ortiz herself would have been on if not for a delay—the US-backed Contras (short for los contrarrevolucionarios) launched a major offensive against Nicaragua’s Sandinista regime, which the Reagan administration labeled as communist. While her rich political analysis of the US-Nicaraguan relationship bears the mark of a trained historian, Dunbar-Ortiz also writes from her perspective as an intrepid activist who spent months at a time throughout the 1980s in the war-torn country, especially in the remote

A New York Times bestseller! For the first time in his own words, President-elect Donald J. Trump explains his plan to make America great again! He wants to “put America’s interests first—and that means doing what’s right for our economy, our national security, and our public safety.” Throughout the 2016 campaign, Trump conjured images of American strength and culture when small towns boomed with industry, mom and pop shops bustled, and people said, “Merry Christmas!” The media scoffed at Trump’s vision and the people who supported him; they were blinded by the Clinton machine. But their eyes were opened after Trump won 62 million votes and the Oval Office. Even Republican House Speaker Paul Ryan said, “Donald Trump heard a voice in this country that no one else heard.” As Trump says in *Time to Get Tough*, “I’ve built businesses

thinking big. I always have. To me it's very simple: If you're going to be thinking anyway, you might as well think big."—Donald J. Trump Here is Trump in action—how he runs his organization and how he runs his life—as he meets the people he needs to meet, chats with family and friends, clashes with enemies, and challenges conventional thinking. But even a maverick plays by rules, and Trump has formulated time-tested guidelines for success. He isolates the common elements in his greatest accomplishments; he shatters myths; he names names, spells out the zeros, and fully reveals the deal-maker's art. And throughout, Trump talks—really talks—about how he does it. A sobering account of a disenfranchised American working class and important policy solutions to the nation's economic inequalities One of the country's leading scholars on economics and social policy, Isabel Sawhill addresses the enormous divisions in American society--economic, cultural, and political--and what might be done to bridge them. Widening inequality and the loss of jobs to trade and technology has left a significant portion of the American workforce disenfranchised and skeptical of governments and corporations alike. And yet both have a role to play in improving the

country for all. Sawhill argues for a policy agenda based on mainstream values, such as family, education, and work. Although many have lost faith in government programs designed to help them, there are still trusted institutions on both the local and the federal level that can deliver better job opportunities and higher wages to those who have been left behind. At the same time, the private sector needs to reexamine how it trains and rewards employees. This book provides a clear-headed and middle-way path to a better-functioning society in which personal responsibility is honored and inclusive capitalism and more broadly shared growth are once more the norm.

democracy. Every major decision governing our diverse, majority-female, and increasingly liberal country bears the stamp of the United States Senate, an institution controlled by people who are almost exclusively white, overwhelmingly male, and disproportionately conservative. Although they do not represent a majority of Americans—and will not for the foreseeable future—today’s Republican senators possess the power to block most legislation. Once known as “the world’s greatest deliberative body,” the Senate has become one of the greatest threats to our democracy. How did this happen? In *Kill Switch*, Senate insider Adam Jentleson contends that far from reflecting the Framers’ vision, the Senate has been transformed over the decades by a tenacious minority of white conservatives. From John Calhoun in the mid-1800s to Mitch McConnell in the 2010s, their primary weapon has been the filibuster, or the requirement that most legislation secure the support of a supermajority of senators. Yet, as Jentleson reveals, the filibuster was not a feature of the original Senate and, in allowing a determined minority to gridlock the federal government, runs utterly counter to the Framers’ intent. For much of its history, the filibuster was used primarily to prevent civil rights legislation from becoming law. But more recently, Republicans have refined it into a tool for imposing their will on all issues, wielding it to thwart an increasingly progressive American majority represented by Barack Obama’s agenda and appointees. Under Donald Trump, McConnell merged the filibuster with rigid leadership structures initially forged by Lyndon Johnson, in the process

surrendering the Senate's independence and centrality, as infamously shown by its acquiescence in Trump's impeachment trial. The result is a failed institution and a crippled democracy. Taking us into the Capitol Hill backrooms where the institution's decline is most evident, Jentleson shows that many of the greatest challenges of our era—partisan polarization, dark money, a media culture built on manufactured outrage—converge within the Senate. Even as he charts the larger forces that have shaped the institution where he served, Jentleson offers incisive portraits of the powerful senators who laid the foundation for the modern Senate, from Calhoun to McConnell to LBJ's mentor, Richard Russell, to the unapologetic racist Jesse Helms. An essential, revelatory investigation, *Kill Switch* ultimately makes clear that unless we immediately and drastically reform the Senate's rules and practices—starting with reforming the filibuster—we face the prospect of permanent minority rule in America.

Portrait offers a unique window of many of the most consequential events of the Trump administration: the appointments of Supreme Court Justices Neil Gorsuch and Brett Kavanaugh, the construction of the border wall, the White House Situation Room on the day of the raid that killed ISIS leader al-Baghdadi, the seventy-fifth anniversary commemoration of D-Day, and leadership of the nation's response to the coronavirus pandemic. We also see President Trump perform the solemn duties of the commander-in-chief: addressing the troops at military bases across the globe, awarding the Medal of Honor, visiting Arlington National Cemetery, bearing witness in the aftermath of natural disasters. And there are intimate, private scenes of the President and First Lady at the White House, as they entertain foreign dignitaries and share quiet moments with family. Featuring more than 250 photographs in gorgeous full-color, here is the first book to gather the official photographs of the Trump White House—and an essential visual documentary of American history. The photographs in this collection have been selected with care by the editors of William Morrow and reproduced to the highest standards.

Dear Reader, Many people have wondered why I've been speaking out on controversial issues for the last few years. They say I've never held political office. I'm not a constitutional scholar. I'm not even a lawyer. All I can say to that is "Guilty as

charged.” It’s true that I’ve never voted for a budget America could not afford. I’ve never raised anyone’s taxes. And I’ve never promised a lobbyist anything in exchange for a donation. Luckily, none of that really matters. Our founding fathers didn’t want a permanent governing class of professional politicians. They wanted a republic, in Lincoln’s words, “of the people, by the people, and for the people.” A country where any farmer, small-business owner, manual laborer, or doctor could speak up and make a difference. I believe that making a difference starts with understanding our amazing founding document, the U.S. Constitution. And as someone who has performed brain surgery thousands of times, I can assure you that the Constitution isn’t brain surgery. The founders wrote it for ordinary men and women, in clear, precise, simple language. They intentionally made it short enough to read in a single sitting and to carry in your pocket. I wrote this book to encourage every citizen to read and think about the Constitution, and to help defend it from those who misinterpret and undermine it. In our age of political correctness it’s especially important to defend the Bill of Rights, which guarantees our freedom to speak, bear arms, practice our religion, and much more. The Constitution isn’t history—it’s about your life in America today. And defending it is about what kind of country our children and grandchildren will inherit. I hope you’ll enjoy learning about the fascinating ways that the founders established the greatest democracy in history—and the ways that recent presidents, congresses, and courts have threatened that democracy. As the Preamble says, the purpose of the Constitution is to

A major new book by New York Times bestselling author and geopolitical forecaster George Friedman (*The Next 100 Years*), with a bold thesis about coming events in Europe. This provocative work examines “flashpoints,” unique geopolitical hot spots where tensions have erupted throughout history, and where conflict is due to emerge again. “There is a temptation, when you are around George Friedman, to treat him like a Magic 8 Ball.” —*The New York Times Magazine* With remarkable accuracy, George Friedman has forecasted coming trends in global politics, technology, population, and culture. In *Flashpoints*, Friedman focuses on Europe—the world’s cultural and power nexus for the past five hundred years . . . until now. Analyzing the most unstable, unexpected, and fascinating borderlands of Europe and Russia—and the fault lines that have existed for centuries and have been ground zero for multiple catastrophic wars—Friedman highlights, in an unprecedentedly personal way, the flashpoints that are smoldering once again. The modern-day European Union was crafted in large part to minimize built-in geopolitical tensions that historically have torn it apart. As Friedman demonstrates, with a mix of rich history and cultural analysis, that design is failing. *Flashpoints* narrates a living history of Europe and explains, with great clarity, its most volatile regions: the turbulent and ever-shifting land dividing the West from Russia (a vast area that currently includes Ukraine, Belarus, and Lithuania); the ancient

borderland between France and Germany; and the Mediterranean, which gave rise to Judaism and Christianity and became a center of Islamic life. Through Friedman's seamless narrative of townspeople and rivers and villages, a clear picture of regions and countries and history begins to emerge. Flashpoints is an engrossing analysis of modern-day Europe, its remarkable past, and the simmering fault lines that have awakened and will be pivotal in the near future. This is George Friedman's most timely and, ultimately, riveting book.
