

English Checkpoint Past Papers

Practical Faster Reading provides the basis for a reading improvement course lasting a total of 30 class hours and has proved popular with students and teachers in a variety of settings. Thirty passages covering a wide range of topics of general interest and accompanying exercises give practice in the reading skills needed at upper-intermediate and more advanced levels.

Substantial increases in reading speed are usually attained with improvements in comprehension and vocabulary. The full answer key for self-checking also makes this useful for the student working alone.

Somehow the boat was still afloat - another wave had lifted it clear of the first rock and was driving it further inshore. It bumped against the base of Crab Rock and skewed around, then tipped momentarily to starboard . . . and as it did so, she saw a figure crouching in the bottom. Hetty's always been a bit of a loner, preferring to keep to the outer edges of the close-knit island community. But when a strange woman is washed up on the shore, Hetty finds herself under increasing scrutiny from the islanders. There's a connection between Hetty and the woman that makes people suspicious, so when death comes to the community the woman is branded a bad omen and Hetty has no choice but to take matters into her own hands. As she heads out to sea, a storm is breaking and the whispers that she's heard before are louder than ever. Voices from the very depths of the sea . . . and they're calling her name.

An inspiring story of courage, adaptation and determination — a year in the life of 11 refugee students entering universities across Canada. "Most journalists have stories they never forget. This is mine." When Debi Goodwin travelled to the Dadaab Refugee Camp in 2007 to shoot a documentary on young Somali refugees soon coming to Canada, she did not anticipate the impact the journey would have on her. A year later, in August of 2008, she decided to embark upon a new journey, starting in the overcrowded refugee camps in Kenya, and ending in university campuses across Canada. For a year, she recorded the lives of eleven very lucky refugee students who had received coveted scholarships from Canadian universities, guaranteeing them both a spot in the student body and permanent residency in Canada. We meet them in the overcrowded confines of a Kenyan refugee camp and track them all the way through a year of dramatic and sometimes traumatic adjustments to new life in a foreign country called Canada. This is a snapshot of a refugee's first year in Canada, in particular a snapshot of young men and women lucky and smart enough to earn their passage from refugee camp to Canadian campus. From the Hardcover edition.

What if Fate were out to get you? The day David Case saves his brother's life, his whole world changes. He must hide, become an entirely new person to escape Fate . . . if he can. This stunning, thought-provoking and darkly comic novel for teenage readers was one of the most eagerly awaited books of 2006.

The Grammar of the English Tense System forms the first volume of a four-volume set, The Grammar of the English Verb Phrase. The other volumes, to appear over the next few years, will deal with mood and modality, aspect and voice. The book aims to provide a grammar of tense which can be used both as an advanced reference grammar (for example by MA-level or postgraduate students of English or linguistics) and as a scientific study which can act as a basis for and stimulus to further research. It provides not only a wealth of data but also a unique framework for the study of the English tense system, which achieves great predictive and explanatory power on the basis of a limited number of relatively simple rules. The framework provided allows for an analysis of the semantics of individual tenses which reflects the role of tenses not only in locating situations in time relative to speech time but also in relating situations in time relative to one another to form temporally coherent discourse. Attention is paid to the relations between tenses. On the one

hand, we can identify sets of tenses linked to particular temporal areas such as the past or the future. These sets of tenses provide for the expression of a system of temporal relations in a stretch of discourse in which all the situations are located within the same temporal area. On the other hand, there are many contexts in which speakers might in theory choose between two or more tenses to locate a situation (e.g., when we choose between the past tense and the present perfect to locate a situation before speech time), and the book examines the difference that a choice of one or the other tense may make within a discourse context. The book moves from a detailed exploration of the meaning and use of individual tenses to a thorough analysis of the way in which tenses can be seen to function together as sets, and finally to a detailed examination of tenses in, and tenses interacting with, temporal adverbials. Original data is used frequently throughout the book to illustrate the theory discussed.
