It is a comprehensive textbook, which provides a good coverage from fundamentals of Financial Accounting to the advanced level. The discussion on various chapters has been done in a simple and easy manner keeping the students of commerce and non-commerce courses in view.

This well-received book, now in its ninth edition, provides a comprehensive analysis of the fundamental concepts of financial management and management accounting. The elegantly combined presentation of the various aspects of financial management and management accounting is a highlight of this text. Focusing on the core areas of financial management—basic concepts of finance, sources of finance, capital structure theories and planning, dividend policies, investment decisions, portfolio management and working capital management—as well as the areas of management accounting—changes in financial position, financial statement analysis and inter-firm comparison, budgetary control and standard costing, and cost information and management decisions—the book also delves on the contemporary topics, such as, financial environment, corporate governance and international financial management, in detail. In addition, it contains a number of case studies on various areas of finance and management accounting. The current edition has been thoroughly revised keeping in view contemporary developments in the literature and applicable provisions of the Companies Act, 2013. Apart from updating the case studies, new cases have been added to support the relevance and quality of discussion. Intended primarily for postgraduate students of commerce (M.Com) and management (MBA with finance specialization), the book will also be highly useful for undergraduate students of Commerce and Management, students of professional courses, such as, CA and ICWA, as well as professionals in the fields of financial management and management accounting. The present treatise has been recommended by many Colleges, Management Institutes and Universities in India for their respective postgraduate and undergraduate commerce and management courses.

This is the seventh edition of Business Law as per CBCS syllabus of Madras University for B.Com (Hons.) Semester IIIrd and B.Com, Corporate Secretary ship Semester Vth Student This book has been divided into 2 Parts – Part-1 is General Principles of Law of Contract & Part- 2 is Special Contracts. The chief aim in writing this book is to present the fundamental principles of Business Law, in a simple and easily intelligible manner. The intricate points of law have been illustrated by examples, and the subject has been dealt with by topics rather than in the strict order of section in the various Act.

Financial Accounting provides a comprehensive, simple, and pragmatic presentation of various concepts in accounting. Rich in pedagogy and extensive in coverage, the book not only meets the requirements of the undergraduate students of different Ind

This book is designed as per Financial Accounting and Advanced Financial Accounting, B.Com Semester I & II, curriculum of various universities of Tamil Nadu. Written with a student friendly approach, it is organised to provide the readers with adequate knowledge on the basics of Financial Accounting. It aims at imparting accounting concepts in a simplified manner, thorough understanding to an average learner. Each chapter is supported with numerous illustrations to help students acquire in-depth knowledge of the concepts; and review questions for easy recap. Additional exercise problems ranging from simple to complex are listed for enhancing earning skills and problem-solving capabilities.

The book in its tenth edition has been thoroughly restructured and revised. All the chapters of the present edition have been re-written not only to incorporate the latest developments in management but also to make presentation of subject-matter more lucid and crisp. Chapter 3 of the previous edition (Managers and Environment) has been named as Management Challenges and Opportunities in the present edition so that proper focus is put on these issues. Thus, the present edition is ideally suited to management students as well as management practitioners, particularly those who have not gone through formal management education.

Each number is the catalogue of a specific school or college of the University.

This book is designed to cater to the needs of 5th and 6th semester B. Com students of Cost Accounting and Advanced Cost Accounting disciplines of University of Madras and other Universities in Tamil Nadu. The chapters in the book have been presented in a simplified way so that even self-learners can easily understand the concepts. Each chapter is supported with numerous illustrations from previous years' question papers and chapter-end exercises. Additionally, several exercise problems have been listed with sufficient hints and answers. This will enable the students to work out the problems independently and face the examinations confidently.

A world list of books in the English language.

This book has been written specifically for the students of BCom (Hons) of the University of Delhi in accordance with its prescribed syllabus and that of School of Open Learning. Its basic features are the same as the mother book Cost Accounting—Principles and Practice, which is a UGC recommended text for the last many years. Thus, it gives a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been organized on 'first things first' basis to sustain the interest of the

students. Every discussion involving conceptual difficulties is immediately followed by a numerical example.

As the global financial crisis has touched the entire world, it is important for entrepreneurs, government officials, and researchers to reflect on its long-lasting effects to the economy. *Economic Growth in Latin America and the Impact of the Global Financial Crisis* is a pivotal reference source containing the latest academic research on risk, economic growth and information security in the Latin American economy. Including coverage among a variety of applicable viewpoints and subjects such as telecommunication, subprime lending, and public education, this book is an ideal reference source for government officials, researchers, academics, and upper-level students seeking innovative research on entrepreneurship and the European debt crisis.

Drawing upon research and practitioner narratives from management, leadership, organizational studies, entrepreneurship and sustainable business domains, this book explores the many pathways that enable emerging countries to transform knowledge into action to achieve economic and sustainable development. The authors take a holistic approach to 'transforming knowledge' that goes beyond the mere 'application of knowledge' to include the assimilation, adaptation, and contextualization of knowledge to suit the unique contexts, needs and conditions existing in emerging countries. They then presents success stories and case studies comprising innovative solutions for emerging economies that practitioners can utilize. Current research in management is highlighted by bringing together academics, practitioners, policy-makers and interest groups from diverse regions and perspectives.

In order to effectively solve business problems, managers need to understand how managerial accounting can improve decision-making. This book lays the groundwork by presenting managerial accounting in a strategic framework. Each module examines cost estimation and planning decisions in both the short- and long-term context. Budgets are then discussed as devices that connect planning and control decisions. Within each chapter, a specific decision problem is framed in a four-step manner. Throughout the pages, Chapter Connections ties the decision problems to concepts in earlier chapters. End-of-chapter material also provides a good balance of quantitative and qualitative problems. This approach enables managers to learn the linkages among seemingly unrelated decisions.

Principles of Financial Accounting provides a clear exposition of the concepts, procedures and techniques of accounting, a subject area that is constantly evolving to meet the growing and dynamic demands of business and industry. Keeping pace with the procedures and techniques is a must for every student planning a career in accounting. With this in view, the University of Delhi has restructured its courses and tried to give a new orientation to commerce education by introducing a new four-year B Com (Hons) course. This book is primarily written keeping in view the requirements of students preparing for this course. **KEY FEATURES** • Simple and reader-friendly text • Blends the concept and practical applications of accounting • Covers the latest concepts, procedures and techniques • Practical problems with short answers for practice

Cost Accounting is designed to provide essential skill sets to managers for planning and controlling their business financials. Covering a wide range of topics, this book is suitable for both undergraduate and postgraduate students of business study courses offered by universities across India. It also meets the requirement of the students of CA, ICWA and CS.

Continued growth of the global market necessitates research that establishes norms and practices and ensures the appropriate level of ethical concern for those who contribute to the process of globalization and are being affected by globalization. *Ethical Models and Applications of Globalization: Cultural, Socio-Political and Economic Perspectives* presents the work of researchers who seek to advance the understanding of both the ethical impact of globalization and the influence of globalization on ethical practices from various cultural, socio-political, economic, and religious perspectives. The aim of this reference work is to put forward empirically grounded methods for understanding both the effect that the process of globalization has on ethical practices in organizations and how this research can shape the course of economic globalization.

The book is exclusively meant for BCom (Hons.) students of Paper CH 1.2, Semester 1, University of Delhi. The book exhaustively covers the entire syllabus of the course. Written in an easy-to-understand language, the book would be highly useful for students who wish to master the concepts of accounting. **KEY FEATURES** • The book is designed on the DIYA (Do It Yourself Approach) • A workbook—added at the end as an annexure—containing numerical questions with their answers, complements the book to help students self-evaluate themselves • There are additional Review Questions, Illustrations, True/False Questions and numerical problems with solutions in the main book • Accounting treatment in the book is in conformity with various laws and accounting standards issued by the Institute of Chartered Accountants of India and prescribed by the Central Government in consultation with the National Advisory Committee on Accounting Standards

Cost Management: For Chaudhary Charan Singh University is structured with rich pedagogy and an easy-to-understand approach, aims at equipping students with a solid grounding in the concepts of cost accounting. Designed to provide a comprehensive background of cost accounting, this book meets all the syllabi requirements of the BBA students of CCSU with content tailored specifically to deliver a perfect solution to all problems in cost accounting.

The book, now in its Second Edition, gives a clear and in-depth analysis of financial statements and provides a harmonious blend of concepts and practices as followed by Indian companies. In this edition, the new format for income statement prescribed in Part II of Schedule VI of the Companies Act, 1956 has been incorporated. Implications of these changes on the analysis and interpretation of the statement have also been discussed. This textbook is primarily intended for undergraduate and postgraduate students of Commerce and Management. In addition, the book will be immensely useful to financial analysts, bank managers for credit analysis, professional accountants and business executives. **KEY FEATURES** ? Provides interpretation of data derived from financial statements. ? Gives an easy method, developed by NCAER, to predict corporate failure. ? Compares firms of different countries and their financial performances. ? Contains more than 172 examples of various types to help students prepare for exams.

This invaluable book contains lectures delivered at the celebrated Seminar in Mathematical Finance at the Courant Institute. The lecturers and presenters of papers are prominent researchers and practitioners in the field of quantitative financial modeling. Most are faculty members at leading universities or Wall Street practitioners. The lectures deal with the emerging science of pricing and hedging

derivative securities and, more generally, managing financial risk. Specific articles concern topics such as option theory, dynamic hedging, interest-rate modeling, portfolio theory, price forecasting using statistical methods, etc. Contents: Deriving Closed-Form Solutions for Gaussian Pricing Models: A Systematic Time-Domain Approach (A Levin) Static Hedging of Exotic Options (P Carr et al.) Closed Form Formulas for Exotic Options and Their Lifetime Distribution (R Douady) Asian Options, the Sum of Lognormals, and the Reciprocal Gamma Distribution (S E Posner & M A Milevsky) Pricing and Hedging American Options: A Recursive Integration Method (M G Subrahmanyam et al.) Piecewise Convex Function Estimation: Pilot Estimators (K S Riedel) E-ARCH Model for Implied Volatility Term-Structure of FX Options (Y-Z Zhu & M Avellaneda) Calibrating Volatility Surfaces via Relative-Entropy Minimization (M Avellaneda et al.) Portfolio-Based Risk Pricing: Pricing Long-Term Put Options with GJR-GARCH(1,1)/Jump Diffusion Process (D-J Guo & S Esipov) Portfolio Generating Functions (R Fernholz) and other papers Readership: Students and researchers in economics, finance and applied mathematics. Keywords:

The 14th Revised Edition of the book "Corporate Accounting" includes the provision of the Companies Act, 2013, SEBI rules and regulations and Accounting Standards, wherever applicable. The whole book has been updated and corrections made wherever required. Theory and accounting treatment has been revised as per Accounting Standards – 4 (Revised) and Companies (Amendment) Act, 2019. Each aspect of a chapter has been discussed in detail in order to meet the requirements of the syllabus prescribed by different universities and professional institutes. Salient Features of the Book The following features are worth noting in the present text: • The illustrations and assignment material has been made to conform to the requirements of Schedule III of the Companies Act, 2013. The relevant problems/solutions has also been revised. • The revised revision of Paragraph 14 of Accounting Standards — 4 concerning Financial Statements regarding Proposed final dividend has been incorporated at relevant pages and the illustrations amended accordingly. • The relevant provisions of Ind AS — 7: Statements of Cash Flows dealing with Bank Overdraft and Proposed Dividend have also been taken care of in this book. • In the chapter of Redemption of Debentures, the treatment of interest on Debenture Redemption Funds Investments or Profit (or Loss) on the sale of DRFI have been also summarised in the chapter. • All chapters have been revised and updated. Problem of each chapter have been suitably graded and edited to include questions of topical interest. We are confident that the book in its revised form will be more useful for B.Com (Pass and Hons.), M.Com, M.B.A., C.A., I.P.C.E, C.A.(Final), I.C.M.A. (Stage II) and Company Secretaries (Executive Programme) Examinations.

Corporate Accounting sets a new standard for the textbooks with rich pedagogy and an easy-to-understand approach that aims at equipping students with a solid grounding in the concepts in corporate accounting. The book is made up of independent chapters dealing with a particular aspect of corporate accounting. The text in each chapter is accompanied with illustrative material and many questions and problems for better grasp of the subject. It not only meets the requirements of the undergraduate students of different Indian universities but it can also be useful for the students of CA, CS, MBA and ICWA. A groundbreaking collection on currency derivatives, including pricing theory and hedging applications. "David DeRosa has assembled an outstanding collection of works on foreign exchange derivatives. It surely will become required reading for both students and option traders."-Mark B. Garman President, Financial Engineering Associates, Inc. Emeritus Professor, University of California, Berkeley. "A comprehensive selection of the major references in currency option pricing."-Nassim Taleb. Senior trading advisor, Paribas Author, Dynamic Hedging: Managing Vanilla and Exotic Options. "A useful compilation of articles on currency derivatives, going from the essential to the esoteric."-Philippe Jorion Professor of Finance, University of California, Irvine Author, Value at Risk: The New Benchmark for Controlling Market Risk. Every investment practitioner knows of the enormous impact that the Black-Scholes option pricing model has had on investment and derivatives markets. The success of the theory in understanding options on equity, equity index, and fixed-income markets is common knowledge. Yet, comparatively few professionals are aware that the theory's greatest successes may have been in the derivatives market for foreign exchange. Perhaps this is not surprising because the foreign exchange market is a professional trading arena that is closed virtually to all but institutional participants. Nevertheless, the world's currency markets have proven to be an almost ideal testing and development ground for new derivative instruments. This book contains many of the most important scientific papers that collectively constitute the core of modern currency derivatives theory. What is remarkable is that each and every one of these papers has found its place in the real world of currency derivatives trading. As such, the contributing authors to this volume can properly claim to have been codevelopers of this new derivatives market, having worked in de facto partnership with the professional traders in the dealing rooms of London, New York, Tokyo, and Singapore. The articles in this book span the entire currency derivatives field: forward and futures contracts, vanilla currency puts and calls, models for American exercise currency options, options on currencies with bounded exchange rate regimes, currency futures options, the term and strike structure of implied volatility, jump and stochastic volatility option pricing models, barrier options, Asian options, and various sorts of quanto options.

This Edition Of Process Planning And Cost Estimation Based On The Latest Syllabus For B.E/B.Tech. Mechanical And Production Engineering For Anna University As Well As Other Universities. It Is A Valuable Asset For Entrepreneurs, Training Managers Of Various Mechanical Workshops And Diploma Students. This Book Is An Attempt To Provide All Necessary Information About Process Planning And Cost Estimation. The Subject Matter Has Been Presented In A Simple And Systematic Way With Numerous Diagrams And Illustrations So As To Enable Thorough Understanding Of The Topics.

The 2008 financial crisis highlighted the need for responsible corporate governance within financial institutions. The key to ensuring that adequate standards are maintained lies with effective accounting and auditing standards. Accounting for Investments: Equities, Futures and Options offers a comprehensive overview of these key financial instruments and their treatment in the accounting sector, with special reference to the regulatory requirements. The book uses the US GAAP requirements as the standard model and the IFRS variants of the same are also given. Accounting for Investments starts from the basics of each financial product and: defines the product analyses the structure of the product evaluates its advantages and disadvantages describes the different events in the trade cycle elaborates on the accounting entries related to these events. The author also explains how the entries are reflected in the general ledger accounts, thus providing a macro level picture for the reader to understand the impact of such accounting. Lucidly written and informative, Accounting for Investments is a comprehensive guide for any professional dealing with these complex products. It also provides an accessible text for technology experts who develop software and support systems for the finance industry.
