The GHS addresses classification of chemicals by types of hazard and proposes harmonized hazard communication elements, including labels and safety data sheets. It aims at ensuring that information on physical hazards and toxicity from chemicals be available in order to enhance the protection of human health and the environment during the handling, transport and use of these chemicals. The GHS also provides a basis for harmonization of rules and regulations on chemicals at national, regional and worldwide level, an important factor also for trade facilitation. This fifth revised edition of the GHS contains various new or revised provisions concerning, inter alia, new hazard categories for chemically unstable gases and non-flammable aerosols; further rationalization of precautionary statements, and further clarification of some of the criteria to avoid differences in their interpretation.--Publisher's description.

The book that inspired the major new motion picture *Mandela: Long Walk to Freedom*. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's anti-apartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. *LONG WALK TO FREEDOM* is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

This book presents an investigation of lexical bundles in native and non-native scientific writing in English, whose aim is to produce a frequency-derived, statistically- and qualitatively-refined list of the most pedagogically useful lexical bundles in scientific prose: one that can be sorted and filtered by frequency, key word, structure and function, and includes contextual information such as variations, authentic examples and usage notes. The first part of the volume discusses the creation of this list based on a multimillion-word corpus of biomedical research writing and reveals the structure and functions of lexical bundles and their role in effective scientific communication. A comparative analysis of a non-native corpus highlights non-native scientists' difficulties in employing lexical bundles. The second part of the volume explores pedagogical applications and provides a series of teaching activities that illustrate how EAP teachers or materials designers can use the list of lexical bundles in their practice.

This book collects articles on the biology of hematopoietic stem cells during embryonic development, reporting on fly, fish, avian and mammalian models. The text invites a comparative overview of hematopoietic stem cell generation in the different classes, emphasizing conserved trends in development. The book reviews current knowledge on human hematopoietic development and discusses recent breakthroughs of relevance to both researchers and clinicians.

Winner of the PEN/Malamud Award: “The genius of his stories is to render his fictional world as timeless.”—Colm Tóibín The sixteen exquisitely crafted stories in Island prove Alistair MacLeod to be a master. Quietly, precisely, he has created a body of work that is among the greatest to appear in English in the last fifty years. A book-besotted patriarch releases his only son from the obligations of the sea. A father provokes his young son to violence when he reluctantly sells the family horse. A passionate girl who grows up on a nearly deserted island turns into an ever-wistful woman when her one true love is felled by a logging accident. A dying young man listens to his grandmother play the old Gaelic songs on her ancient violin as they both fend off the inevitable. The events that propel MacLeod's stories convince us of the importance of tradition, the beauty of the landscape, and the necessity of memory.

NEW YORK TIMES BESTSELLER • The beloved author of The Handmaid’s Tale reimagines Shakespeare’s final, great play, The Tempest, in a gripping and emotionally rich novel of passion and revenge. “A marvel of gorgeous yet economical prose, in the service of a story that’s utterly heartbreaking yet pierced by humor, with a plot that retains considerable subtlety even as the original’s back story falls neatly into place.”—The New York Times Book Review Felix is at the top of his game as artistic director of the Makeshiweg Theatre Festival. Now he’s staging aTempest like no other: not only will it boost his reputation, but it will also heal emotional wounds. Or that was the plan. Instead, after an act of unforeseen treachery, Felix is living in exile in a backwoods hovel, haunted by memories of his beloved lost daughter, Miranda. And also brewing revenge, which, after twelve years, arrives in the shape of a theatre course at a nearby prison. Margaret Atwood’s novel take on Shakespeare’s play of enchantment, retribution, and second chances leads us on an interactive, illusion-ridden journey filled with new surprises and wonders of its own. Praise for Hag-Seed “What makes the book thrilling, and hugely pleasurable, is how closely Atwood hews to Shakespeare even as she casts her own potent charms, rap-composition included. . . . Part Shakespeare, part Atwood, Hag-Seed is a most delicate monster—and that’s ‘delicate’ in the 17th-century sense. It’s delightful.”—Boston Globe “Atwood has designed an ingenious doubling of the plot of The Tempest: Felix, the usurped director, finds himself cast by circumstances as a real-life version of Prospero, the usurped Duke. If you know the play well, these echoes grow stronger when Felix decides to exact his revenge by conjuring up a new version of The Tempest designed to overwhelm his enemies.”—Washington Post “A funny and heartwarming tale of revenge and redemption . . . Hag-Seed is a remarkable contribution to the canon.”—Bustle

For a number of years, the healthy and environment-friendly building material earth, in common use for thousands of years, has been enjoying increasing popularity, including in industrialized nations. In hot dry and temperate climate zones, earth offers numerous advantages over other materials. Its particular texture and composition also holds great aesthetic appeal. The author's presentation reflects the rich and varied experiences gained over thirty years of building earth structures all over the world. Numerous photographs of construction sites and drawings show the concrete execution of earth architecture.

An aunt imparts wisdom to her teenage niece, inspired by the works of Jane Austen, in this novel from the Man Booker Prize-nominated author. Alice is an aspiring novelist with green hair and zero interest in reading Jane Austen for her college English class. However, her Aunt Fay, a novelist herself, isn't about to let Alice stick her nose up at Austen or other enduring authors. "You find her boring, petty and irrelevant, and, that as the world is in crisis, and the future catastrophic, you cannot imagine what purpose there can be in reading her," Fay writes her. "My dear pretty little Alice, now with black and green hair . . . How can I hope to explain Literature to you, with its capital 'L'?" Alternating between passages from Jane Austen's novels and accounts of her own career, Aunt Fay pays tribute to a great author, explores the craft of fiction, and charts her niece's development as a writer in this unique book that reveals how Austen—and great literature—is truly, wonderfully timeless.

The Prisoner of Zenda is a dystopian adventure novel in which the King of Ruritania is drugged on the eve of his coronation and thus is unable to attend the ceremony. Political forces within the realm are such that, in order for the king to retain the crown, his coronation must proceed. Fortuitously, an English gentleman on holiday in Ruritania who resembles the monarch is persuaded to act as his political decoy in an effort to save the unstable political situation of the interregnum.

With their tidal imagination, the poems in this debut collection sweep between old worlds and new, seeking the lost and recovering the found among shipwrecks, underwater zoos and discovered lands. Emma Jones brings her inventive worlds dramatically to life in a series of vividly distilled meetings - of settlers and indigenous peoples, of seawaters and shore, of humanity and the wilds of nature. Here, tigers stalk the captive and the free, while Death encounters his own double and Daphne tells of her new leaves, 'They sing, and make the world.' The same might be said of the poems themselves in this restless and memorable search for belonging.

The Merchant of Venice has been performed more often than any other comedy by Shakespeare. Molly Mahood pays special attention to the expectations of the play's first audience, and to our modern experience of seeing and hearing the play. In a substantial new addition to the Introduction, Charles Edelman focuses on the play's sexual politics and recent scholarship devoted to the position of Jews in Shakespeare's time. He surveys the international scope and diversity of theatrical interpretations of The Merchant in the 1980s and 1990s and their different ways of tackling the troubling figure of Shylock.

Master's Thesis from the year 2013 in the subject Pedagogy - Common Didactics, Educational Objectives, Methods, language: English, abstract: The topic of concern of the research is the critical thinking ability of the primary and high school students of Bangladesh and its effects on their tertiary level education. In the research, the critical thinking ability of these levels of students was found to be deficient to an extent. The research has found that the recently introduced creative method has proved to be more favorable for developing the critical thinking ability of the students than the previous methods, though the creative method is struggling for effective implementation for various reasons. For example, the lack of trained teachers, partial knowledge of the students about the creative method and accessibility to guidebooks are contributing to the unsuccessful application of the method. Moreover, the research found out that there is an urge on the part of students for modification of the creative method. Besides, fragmented knowledge on different topics in different classes or grades, lecture-based classes, the tendency of taking down lecture notes in H.S.C and university levels are also responsible for a lack of critical thinking abilities of the students. Furthermore, the tendency of memorizing essays and question- answers has not been lessened as memorized essays and notes carry good marks even in the new system of examination. Indeed, the research findings do agree with the fact that the lack of critical thinking ability among the students of Bangladesh is particularly due to the effects of our education policies, memorizing and passive learning on the part of students on a large scale. Therefore, proper knowledge of and training in the creative method on the part of both the students and teachers, adequate implementation of the creative method at school and college levels, effective interac

Education is the most effective tool and a medium of human development. It changes the mindsets through a continuous process involving, research, experiment and innovation. Muhammad Yunus is that rare thing: a bona fide visionary. His dream is the total eradication of poverty from the world. In 1983, against the advice of banking and government officials, Yunus established Grameen, a bank devoted to providing the poorest of Bangladesh with minuscule loans. Grameen Bank, based on the belief that credit is a basic human right, not the privilege of a fortunate few, now provides over 2.5 billion dollars of micro-loans to more than two million families in rural Bangladesh. Ninety-four percent of Yunus's clients are women, and repayment rates are near 100 percent. Around the world, micro-lending programs inspired by Grameen are blossoming, with more than three hundred programs established in the United States alone. Banker to the Poor is Muhammad Yunus's memoir of how he decided to change his life in order to help the world's poor. In it he traces the intellectual and spiritual journey that led him to fundamentally rethink the economic relationship between rich and poor, and the challenges he and his colleagues faced in founding Grameen. He also provides wise, hopeful guidance for anyone who would like to join him in "putting homelessness and destitution in a museum so that one day our children will visit it and ask how we could have allowed such a terrible thing to go on for so long." The definitive history of micro-credit direct from the man that

conceived of it, *Banker to the Poor* is necessary and inspirational reading for anyone interested in economics, public policy, philanthropy, social history, and business. Muhammad Yunus was born in Bangladesh and earned his Ph.D. in economics in the United States at Vanderbilt University, where he was deeply influenced by the civil rights movement. He still lives in Bangladesh, and travels widely around the world on behalf of Grameen Bank and the concept of micro-credit.

These are just some of the questions you will find answered in this delightful collection of stories recounting real-life incidents from the life of Sudha Murty—teacher, social worker and bestselling writer. There is the engaging story about one of her students who frequently played truant from school. The account of how her mother's advice to save money came in handy when she wanted to help her husband start a software company, and the heart-warming tale of the promise she made—and fulfilled—to her grandfather, to ensure that her little village library would always be well supplied with books. Funny, spirited and inspiring, each of these stories teaches a valuable lesson about the importance of doing what you believe is right and having the courage to realize your dreams.

Renowned Marxist scholar and critical media theorist Christian Fuchs provides a thorough, chapter-by-chapter introduction to *Capital Volume 1* that assists readers in making sense of Karl Marx's most important and groundbreaking work in the information age, exploring Marx's key concepts through the lens of media and communication studies via contemporary phenomena like the Internet, digital labour, social media, the media industries, and digital class struggles. Through a range of international, current-day examples, Fuchs emphasises the continued importance of Marx and his work in a time when transnational media companies like Amazon, Google, and Facebook play an increasingly important role in global capitalism. Discussion questions and exercises at the end of each chapter help readers to further apply Marx's work to a modern-day context.

The original 1818 text of Mary Shelley's classic novel, with annotations and essays highlighting its scientific, ethical, and cautionary aspects. Mary Shelley's *Frankenstein* has endured in the popular imagination for two hundred years. Begun as a ghost story by an intellectually and socially precocious eighteen-year-old author during a cold and rainy summer on the shores of Lake Geneva, the dramatic tale of Victor Frankenstein and his stitched-together creature can be read as the ultimate parable of scientific hubris. Victor, "the modern Prometheus," tried to do what he perhaps should have left to Nature: create life. Although the novel is most often discussed in literary-historical terms—as a seminal example of romanticism or as a groundbreaking early work of science fiction—Mary Shelley was keenly aware of contemporary scientific developments and incorporated them into her story. In our era of synthetic biology, artificial intelligence, robotics, and climate engineering, this edition of *Frankenstein* will resonate forcefully for readers with a background or interest in science and engineering, and anyone intrigued by the fundamental questions of creativity and responsibility. This edition of *Frankenstein* pairs the original 1818 version of the manuscript—meticulously line-edited and amended by Charles E. Robinson, one of the world's preeminent authorities on the text—with annotations and essays by leading scholars exploring the social and ethical aspects of scientific creativity raised by this remarkable story. The result is a unique and accessible edition of one of the most thought-provoking and influential novels ever written. Essays by Elizabeth Bear, Cory Doctorow, Heather E. Douglas, Josephine Johnston, Kate MacCord, Jane Maienschein, Anne K. Mellor, Alfred Nordmann

Leopold von Ranke, who was born in 1795, is considered to be one of the founders of the modern practice of writing history. This collection of his writings, edited and introduced by Georg G. Iggers, was first published in 1973 and remains the leading collection of Ranke's writings in the English language. Now updated with the needs of current students in mind, this edition includes previously untranslated materials by the young Ranke, focusing particularly on the relationship between history and religion together with his inaugural lecture of 1836 'On the Relation and Difference between History and Politics'. Including pieces on historical science, and on the relationship between history and philosophy, as well as country specific histories, this book is essential reading for all students of historiography.
