Introduction by Richard Carpenter The definitive biography of one of the most enduring and endeared recording artists in history—the Carpenters—is told for the first time from the perspective of Richard Carpenter, through more than 100 hours of exclusive interviews and some 200 photographs from Richard's personal archive, many never published. After becoming multimillion-selling, Grammy-winning superstars with their 1970 breakthrough hit "(They Long to Be) Close to You," Richard and Karen Carpenter would win over millions of fans worldwide with a record-breaking string of hits including "We've Only Just Begun," "Top of the World," and "Yesterday Once More." By 1975, success was taking its toll. Years of jam-packed work schedules,

including hundreds of concert engagements, proved to be just too much for the Carpenters to keep the hits coming—and, ultimately, to keep the music playing at all. However, Richard and Karen never took their adoring public, or each other, for granted. In *Carpenters: The Musical Legacy*, Richard Carpenter tells his story for the first time. With candor, heart, and humor, he sheds new light on the Carpenters' trials and triumphs—work that remains the gold standard for melodic pop. This beautifully illustrated definitive biography, with exclusive interviews and never-before-seen photographs, is a must-have for any Carpenters fan.

making masters through the years have used it in feature films, short films and television. This second edition also introduces and explores two of the biggest innovations of recent years - at opposite ends of the industry. At the top-end, for film-makers with serious budgets, there is 3D printing in the creation of replacement parts for stop-motion characters while at the amateur/student end of the industry there are a variety of cheap, but effective, apps that can turn a smartphone into a mini stop-motion studio. The new edition also includes an extended project in each chapter, covering storytelling techniques, selecting an appropriate style, developing a character, set building and lighting, creating a performance and adding music. These projects combine to lead you through the creation of your first one-minute stop-motion animation.

New York Times bestselling author Steve Sheinkin presents a follow up to his award-winning book *Bomb: The Race to Build--and Steal--the World's Most Dangerous Weapon*, taking readers on a terrifying journey into the Cold War and our mutual assured destruction. As World War II comes to a close, the United States and the Soviet Union emerge as the two greatest world powers on extreme opposites of the

political spectrum. After the United States showed its hand with the atomic bomb in Hiroshima, the Soviets refuse to be left behind. With communism sweeping the globe, the two nations begin a neck-and-neck competition to build even more destructive bombs and conquer the Space Race. In their battle for dominance, spy planes fly above, armed submarines swim deep below, and undercover agents meet in the dead of night. The Cold War game grows more precarious as weapons are pointed towards each other, with fingers literally on the trigger. The decades-long showdown culminates in the Cuban Missile Crisis, the world's close call with the third—and final—world war. “Different from any knitting book I’ve ever seen! Think of it as a journal of your life, not with pen and paper, but with knitting needles” (Lisa Congdon, author of *Find Your Artistic Voice*). Record the beauty, emotions, and experiences of everyday life—with your knitting needles! Author Lea Redmond offers thirty-two enchanting projects that will inspire you to create beautiful finished pieces full of personal meaning and memories. Stock up on shades of blue, gray, and white and knit one strip of a scarf each day for a year, using the color that matches the sky on that day. When you’re done, you’ll have a unique memento of your year better than anything you can keep in a scrapbook. Or when you’re traveling, knit postcard-size swatches at each place you visit, using the colors you see around you. When the trip is over, piece the swatches together into a throw or scarf that will remind you of your journey every time you use it. Or knit a height-chart scarf for a beloved baby, starting with her length at birth, then add inches each year until you have the perfect gift for her eighteenth birthday. These are knitting projects like no other, resulting in one-of-a-kind heirlooms that tell a story only you can tell. Redmond provides instructions for all the stitches and techniques you need, as well as required patterns. “In this charming book, Lea Redmond puts her big heart into creative knitting projects. She reminds us that the sky’s the limit—in knitting and in life.” —Ann Hood, author of *The Knitting Circle* “Not your usual book about knitting . . . [It] aspires to turn on your creativity, to awaken the designer within you.” —In *Stitches*

What happens when we set out to understand LEGO not just as a physical object but as an idea, an icon of modernity, an image—maybe even a moving image? To what extent can the LEGO brick fit into the multimedia landscape of popular culture, especially film culture, today? Launching from these questions, Dana Polan traces LEGO from thing to film and asserts that *The LEGO Movie* is an exemplar of key directions in mainstream cinema, combining the visceral impact of effects and spectacle with ironic self-awareness and savvy critique of mass culture as it reaches for new heights of creativity. Incorporating insights from conversations with producer Dan Lin and writer-directors Phil Lord and Chris Miller, Polan examines the production and reception of *The LEGO Movie* and closely analyzes the film within popular culture at large and in relation to LEGO as a toy and commodity. He identifies the film's particular stylistic and narrative qualities, its grasp of and response to the culture industry, and what makes it a distinctive work of animation within the seeming omnipresence of animation in Hollywood, and reveals why the blockbuster film, in all its silliness and seriousness, stands apart as a divergent cultural work. Children will find artistic inspiration as they learn about iconic artists Frida Kahlo and Diego Rivera in these imaginative and

colorful activities. The art and ideas of Kahlo and Rivera are explored through projects that include painting a self-portrait Kahlo-style, creating a mural with a social message like Rivera, making a Day of the Dead ofrenda, and crafting an Olmec head carving. Vibrant illustrations throughout the book include Rivera's murals and paintings, Kahlo's dreamscapes and self-portraits, pre-Columbian art and Mexican folk art, as well as many photographs of the two artists. Children will learn that art is more than just pretty pictures; it can be a way to express the artist's innermost feelings, a source of everyday joy and fun, an outlet for political ideas, and an expression of hope for a better world. Sidebars will introduce children to other Mexican artists and other notable female artists. A time line, listings of art museums and places where Kahlo and Rivera's art can be viewed, and a list of relevant websites complete this cross-cultural art experience.

Introduce kids to stop-motion animation and animated filmmaking. Animation is everywhere--from movies and TV to apps and video games--and today's tech-savvy kids know all about it. With the accessibility and ease of use of cameras and video-editing software, people of all ages are learning how to make stop-motion animation. In "Animation Lab for Kids," artists, teachers, and authors Laura Bellmont and Emily Brink present exciting, fun, hands-on projects that teach kids a range of animation techniques. From the classic zoetrope, flip book, and cel methods (which don't require any devices or technology) to different methods of shooting, the lessons require no previous experience for either child or adult.

Experimenting with a variety of art materials (drawing, clay, and paper cut-outs), young animators will learn to plan a film through writing, storyboarding, and creating sets. The book also features helpful and informative sidebars on the history of the early animation techniques as well as the inspiring work of innovative and influential animators, including Kirsten Lepore, PES, Hailey Morris, and William Kentridge. The authors are co-founders and lead teachers of The Good School, an arts-education school that cultivates and combines traditional art-making skills and the technologies involved in stop-motion animation filmmaking.
