An honour book and shortlisted title in the CBC Early Childhood book of the Year Awards 2009. Tom Tom is an engaging contemporary story that traces a day in the life of a small boy living in a typical Aboriginal community in the Top End of the Northern Territory. It follows the adventures of Tom Tom as he goes to preschool, eats lunch with Granny Annie in the bottom camp, swims in the Lemonade Springs in the afternoon and spends the night with Granny May and grandfather Jo in the top camp. Rosemary Sullivan's simple text and Dee Huxley's vivid

illustrations captures the warmth and security of Tom Tom's world as he moves freely within his community from relative to another. As a pre-school teacher working in remote Aboriginal communities for more than 17 years, Rosemary Sullivan says: 'Tom Tom was inspired by the lives of many indigenous children in the Top End and the importance of family and interconnectedness in Aboriginal life.'

Two iconic bands. An unforgettable life. One of the most dynamic groups of the '70s and '80s, Talking Heads, founded by drummer Chris Frantz, his girlfriend Tina Weymouth, and lead singer David Byrne, burst onto the music scene, playing at CBGBs, touring Europe with the Ramones, and creating hits like "Psycho Killer" and "Burning Down the House" that captured the post-baby boom generation's intense, affectless style. In *Remain in Love*, Frantz writes about the beginnings of Talking Heads—their days as art students in Providence, moving to the sparse Chrystie Street loft Frantz, Weymouth, and Byrne shared where the music that defined an era was written. With never-before-seen photos and immersive vivid detail, Frantz describes life on tour, down to the meals eaten and the clothes worn—and reveals the mechanics of a long and complicated working relationship with a mercurial frontman. At the heart of *Remain in Love* is Frantz's love for Weymouth: their once-in-a-lifetime connection as lovers, musicians, and bandmates, and how their creativity surged with the creation of their own band Tom Tom Club, bringing a fresh Afro-Caribbean beat to hits like "Genius of Love." Studded with memorable places and names from the era—Grace Jones, Andy Warhol, Stephen Sprouse, Lou Reed, Brian Eno, and Debbie Harry among them—*Remain in Love* is a frank and open memoir of an emblematic life in music and in love.

Early in their careers, most musicians find it hard to believe that their band might

ever make enough money to fight over. But sooner than you think, success may arrive, and without clear terms of how the band is organized and who controls what rights, your best friends and fellow musicians may become your worst enemies. Anyone who seeks to enter the complex world of the music business ought to know what to do in order to avoid derailing a high-speed ride to the top of the charts.

In *The Future We Choose*, Christiana Figueres and Tom Rivett-Carnac--who led negotiations for the United Nations during the historic Paris Agreement of 2015--have written a cautionary but optimistic book about the world's changing climate and the fate of humanity. The authors outline two possible scenarios for our planet. In one, they describe what life on Earth will be like by 2050 if we fail to meet the Paris Agreement's climate targets. In the other, they lay out what it will be like to live in a regenerative world that has net-zero emissions. They argue for confronting the climate crisis head-on, with determination and optimism. *The Future We Choose* presents our options and tells us what governments, corporations, and each of us can, and must, do to fend off disaster.

NEW 3rd Edition - September 2020 This is the third edition of the book that has earned 14 5-star reviews. It's now bigger,richer and better. Your walk-through guide to Developer Marketing and Relations now has 9 new chapters since the first edition + 1 more reviewed chapter. Build your DevRel dream team and project. Learn from success and failure stories. Welcome to the third edition of "Developer Marketing and Relations: The Essential Guide". The history starts in October 2017, during the Future Developer Summit. There, Andreas Constantinou and Nicolas Sauvage fully recognized the fragmented nature of developer relations or DevRel - from the types of companies, the products they represented, and the knowledge of the practitioners. It was there we witnessed that the best practices were often locked behind the doors of the companies that mastered them. We knew we wanted develop an essential guide to share this knowledge with a broader audience of developer relations, evangelists & advocates, developer marketing practitioners and beyond. As we have watched

the practice of DevRel grow and evolve over the last three years, there is a continued need for education of what DevRel is, along with the strategy and tactics needed for a successful program. The good news is, many of the leading practitioners from the best companies agreed to share their knowledge, stories, learnings, and best practices in this guide! We think you'll find the information insightful, whether you are a seasoned professional in developer relations or you are just getting started. A question we often get asked is: "Can you help us understand how Mozilla, Google, or Microsoft practice developer marketing?" (replace names with your favorite tech brands). That's exactly what this book aims to accomplish. This guide is arranged in an order that takes you from strategic issues to more tactical issues. You can read from start to finish, or jump into the chapter that focuses on what you need to know right now. At a strategic level, you may want to read "Using Developer Personas to Stay Customer-Obsessed" from Cliff Simpkins of Microsoft, or if you are building out a program you might try "Structuring Developer Relations", by Dirk Primbs of Google. If you are just starting out, be sure to read, "Starting from Scratch: How to Build a Developer Marketing Program", by Luke Kilpatrick of Nutanix. If you need to get many stakeholders together in a large organization, the "The Developer Relations Council: Leading and Aligning Developer Marketing within Large Companies" by Arabella David of Salesforce - a new chapter for the third edition- is a must. Then, learn how to understand numbers and KPIs in our new chapter "Measuring the success of a developer communications strategy" by our very own Rich Muir of SlashData. As mentioned, developer programs exist in many types, as different companies are marketing different types of products to developers. Ana Schafer and Christine Jorgensen of Qualcomm describe their experiences with communities around hardware in "Hardware Is the New

Software - Building A Developer Community Around A Chip Instead Of An SDK". APIs are well known as a key product in DevRel so we are pleased to bring you a new chapter by Mehdi Medjaoui, founder of APIdays conferences "Developer Relations and APIs". We can't list all of the great chapters here, but we would be remiss if we didn't point out the chapters on community, the heart and soul of any leading developer relations program. Be sure to read "The Power Of Community" by Jacob Lehrbaum of Salesforce, and the new chapter "Building an Inclusive Developer Community" by Leandro Margulis, based on his days at TomTom. Andreas Constantinou, Founder & CEO, SlashData Nicolas Sauvage, President & Managing Director, TDK Ventures Caroline Lewko & Dana Fujikawa, Editors of the third edition, WIP A guide to effectively searching the Internet covers such topics as search engines, directories, newsgroups, image resources, and reference resources.
