The Global Status Report on Road Safety 2018, launched by WHO in December 2018, highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians, cyclists and motorcyclists, in particular those living in developing countries. The report suggests that the price paid for mobility is too high, especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives. Provides information on the new features of current car and truck models, lists

Log 41 both observes the state of architecture today and devotes 114 pages to a special section called *Working Queer*, guest-edited by architect Jaffer Kolb. From Hans Tursack's commentary on "shape architecture" to Michael Young's valuation of parafiction as a critique of realism; from Lisa Hsieh's examination of modernology in Japan to Cynthia Davidson's conversation with Martino Stierli, *Log 41* considers both history and the contemporary. In *Working Queer*, nineteen authors take a similar look at history and the contemporary in articles ranging from homo-fascism in early 20th-century aesthetics to trans gender bathroom typologies for today, as well as methods of work, materials, and mediation that can all be considered queer, or queering, in our pluralist, mediated world.

The Viper stunned Americans by showing that Dodge, whose cars were all front-wheel drive (and mostly powered by four-cylinder engines), could make a raw, brutal, V-10-powered car that could run with the best. Team Viper went a step further at Le Mans, proving that an American car could handle turns, too - so well that it won its class, repeatedly, at a fraction of the cost of the cars it beat. Dodge Viper covers the transition from a concept to a rough and brutal rocket to a world-class supercar, and includes every generation. The story also tells of the rough times when the entire Viper business could have been sold to the highest bidder, and considers alternative paths the 2013-17 Viper might have taken. This is not just a gushing tribute to the Dodge Viper, the author provides an objective view of the full story, using business, historical, and enthusiast perspectives. The book looks at the business case for each generation, the development stories and their outcomes, and describes some of the issues owners may have to watch out for, particularly in the early models.

Covers all models of Pick-Up, Tacoma, T100, Land Cruiser, 4Runner, 2 and 4 wheel drive.

Looks at the combustion basics of fuel injection engines and offers information on such topics as VE equation, airflow estimation, setups and calibration, creating timing maps,
